# Computer Assignment 1
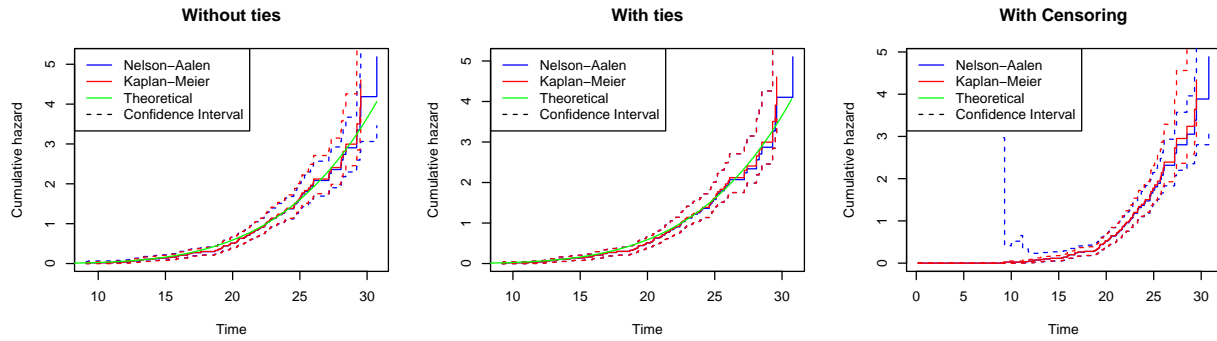

Jan Alexandersson, Anton Stråhle & Max Sjödin
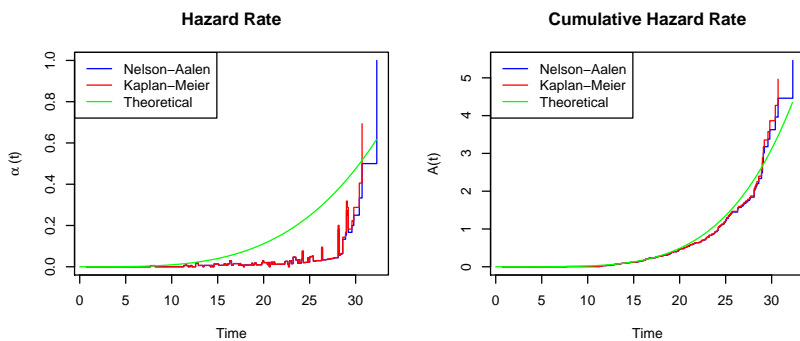

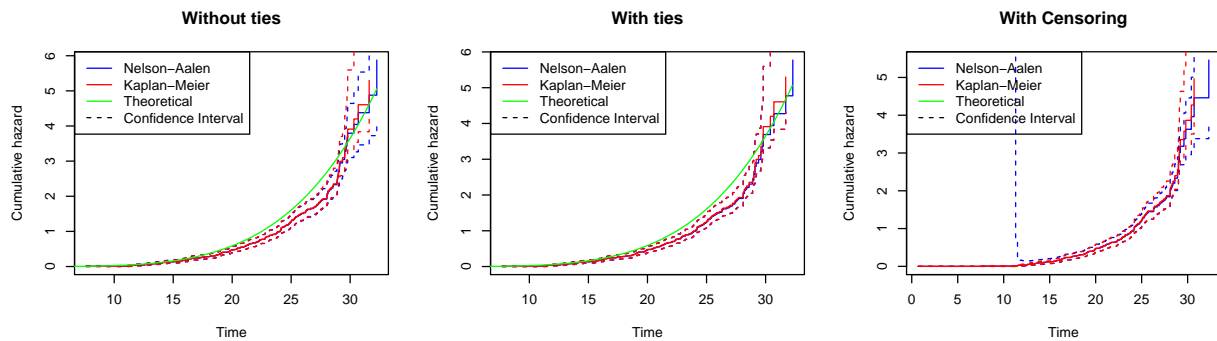

September 19, 2020

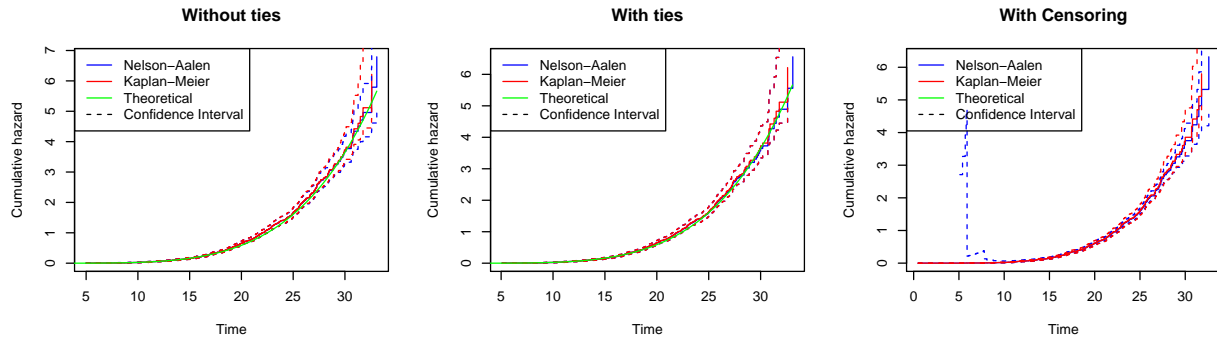

For 10 observations

Write about n = 10 here

Without ties

With ties

With Censoring

For 100 observations

Hazard Rate

Cumulative Hazard Rate

Write about n = 100 here

Without ties

With ties

With Censoring

For 200 observations

Hazard Rate

Cumulative Hazard Rate

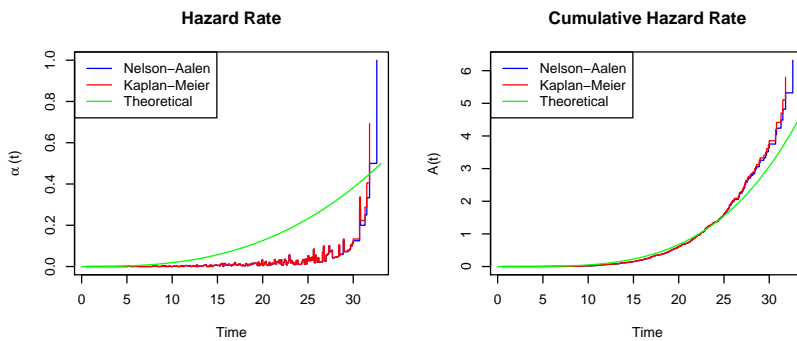

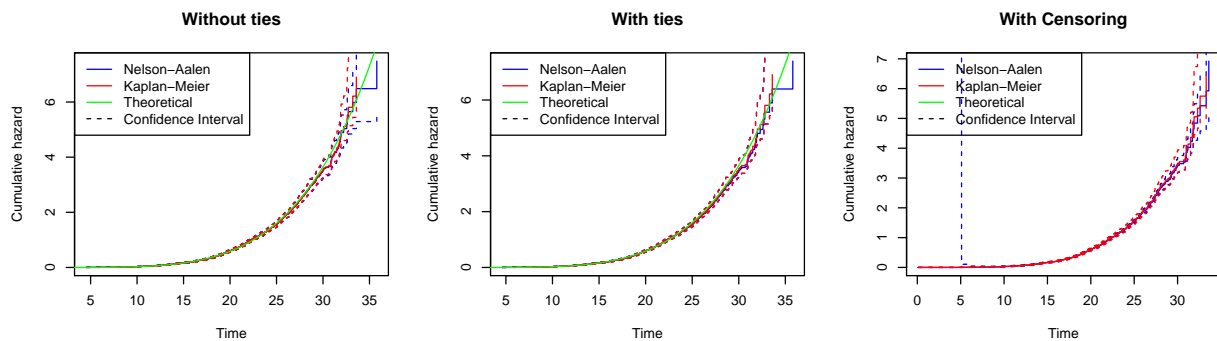

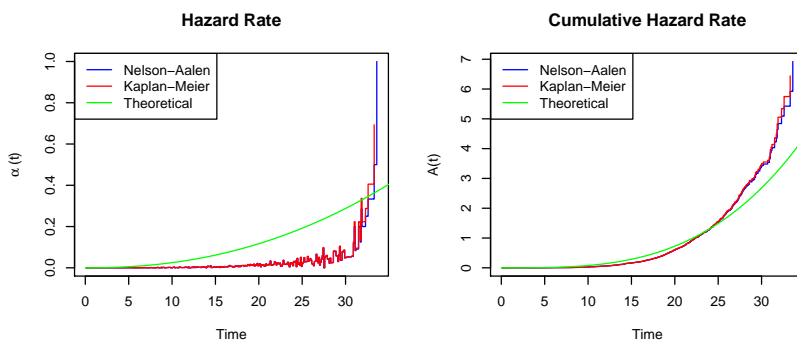

Write about n = 200 here

For 500 observations

Write about n = 500 here

For 1000 observations

Write about n = 1000 here

Write a summary here and answer:

- Argue for the performance of the estimators relative to the true theoretical model used, is any of the two preferable? • What is the effect of censoring? • What is the effect of n?
